Hello everyone,

This is an initiative to collect data regarding the merchandise design in general at IISER Mohali. The attached form is a detailed survey of what the community seeks in the merchandise designed and launched on the campus, whether by a club, an event/fest committee, or any other student sub-body. We look forward to making the collected data public (after anonymizing respondents) and inviting the members of IISER Mohali to analyse the dataset and publish their inferences for the community. These insights can then be utilized by any institutional body to deliver much better merchandise. However, this will only be beneficial if we receive a sufficient number of responses. We request you to ask your friends and peers in IISER Mohali to submit the form as well, irrespective of whether they intend to buy a merch or not. The more data we collect, the better the inferences and conclusions will be.

Form link: <https://forms.gle/poPCauPG4yiC8DCd8>

Please note that the form being sent by the Turing Club should not (in this case) imply the form to be Turing-specific. The form collects data that is general (or can be generalized across certain questions) regarding the community's merchandise preferences. We hope this initiative will benefit all merchandise releases in the future. The form will close on **31 May**.

Turing merch form will be released separately later.

We understand that the submitted data and opinions towards fashion will change with time. Despite shifting fashion trends and trending items, there are certain intensive properties of an item and an individual's preferences that remain constant over longer periods, irrespective of the trend. We look forward to capturing these patterns and trends to serve you better, and we hope this initiative continues in future at particular time intervals.

Regards,

Turing Club

The Computation Club of IISER Mohali
